

FRITZ-PAK makes it easy to "go with the flow"

FILL FLOW

Fritz-Pak's **Fill Flow** is a powdered admixture for the production of flowable fill. Packaged in an easy-to-use water soluble bag, it entrains up to 30% air to produce an extremely flowable material with low water content. Fill Flow works faster and better than other available products, but without their offensive odors. It's safer for operators since the powder is contained in the inner bag, which is added directly to the ready mix truck without opening.

Try it, and see how easy it is to **"go with the flow"**. Call Fritz-Pak today for free samples!
