

Time Can Be Bought.

READY-MIX PRODUCERS:

How many times do you have to wait unexpectedly? Maybe it's traffic, maybe job site delays, maybe the inspector is late. Extend the life of your concrete with Mini Delayed Set and solve the problem.

PUMPERS:

Eliminate "Boom Parties". Retard your concrete whenever you have to wait on the job. Put one bag of Mini Delayed Set in your hopper, recirculate the concrete in the boom, and give yourself more time.

CONTRACTORS:

Are you short on manpower? Good designs for decorative concrete are getting more challenging, and concrete artisans are hard to find. Use Mini Delayed Set for Step Retardation while placing concrete. Retard different portions of the load to work separate sections of your pour, and make the best possible use of your workers.
