

# PUMPING AT ANY LEVEL DEMANDS

## Slick-Pak

The original, patented formula that continues to work like a charm. Mix for a few minutes, prime, and go. Independent studies show it works better than competitive products.

# ONLY THE VERY BEST... FRITZ-PAK!

## Slick-Pak II

The best pump primer available, and the only one whose performance exceeds that of Slick-Pak. Use as a primer or add directly to the concrete as a pumping aid.

## Mini Delayed Set - Concrete Set Retarder

Carry this concrete set retarder at all times for the peace of mind it gives and never throw a "boom party" again. When unexpected delays occur, toss one bag in your hopper and recirculate concrete through the pump until the pour is ready to continue.

## Slick-Pak Liquid

Developed for those who prefer the faster-dissolving properties of a liquid. Especially suitable for priming short runs of pipe, trailer pumps and plaster pumps.
