FRITZ-PAK

MORTAR SET RETARDER

DELAY SET ADMIXTURE

Fritz-Pak Mortar Set Retarder is a powdered set retarder for use in pre-packaged mortar or concrete. It slows down set times without affecting compressive strength. It is ready for easy dosing. No premixing is required. Since Mortar Set Retarder is white, it will not affect colors in concrete, which makes it ideal for decorative concrete work. No special handling or storage is required.

ADVANTAGES

- Improved workability
- Prolonged decorative concrete work
- 1 bag extends set time by 1 hour
- Does not affect the color of concrete or mortar mixes

CERTIFICATIONS

ASTM C-494 Type B

PACKAGING

ITEM NUMBER	WEIGHT	BAGS PER BOX	BOXES PER CASE	CASES PER PALLET
98453	5.6 ounces	24	6	32

DOSAGE

One 5.3 oz (150 gram) bag of Mortar Set Retarder will retard one 60-80 lbs bag of pre-packaged mortar or concrete for about one hour. You may redose for longer periods of retardation, without exceeding 3 bags of Mortar Set Retarder per bag of mortar or concrete. For Portland cement use 4 bags per 100 lbs of cement for one hour set retardation. Do not exceed 12, bags per 100 lbs of cement. At higher air temperatures, the retardation effect is reduced.
