

Control Finish

Finishing Aid

Fritz-Pak Control Finish is a dry, powdered finishing aid. It is packaged in an easy-to-use, **water-soluble bag** that allows for easy preparation of solutions at the job site. This product improves concrete surface finishing characteristics without retempering with water. This avoids many common surface problems, including plastic shrinkage cracks, dusting, cracking, and crazing. Sprayed on lightly and troweled in, Control Finish produces a high quality surface that is easy to finish and extremely durable. It also makes stamping and the addition of color hardeners much easier.

No 97000

MEETS STANDARDS

There are not applicable standards for this product.

PACKAGING:

SIZE	(2) 9 oz. Bags
BAGS/CASE	30
CASES/PALLET	32

Also available in 50 lb. bags

ADVANTAGES

- No need to retemper the concrete surface
- Reduced risk of crazing due to windy conditions
- Enhanced concrete color
- Small packaging fits inside narrow-mouth sprayers

INSTRUCTIONS

- Add 1 inner pack to 1.5 gallons of water, or both inner packs to 3 gallons of water. For a stronger solution, both packs may be used in as little as 1.5 gallons of water.
- Mix or shake for 3-5 minutes to uniformly dissolve. Periodic remixing may be required.
- Prior to troweling, mist Control Finish evenly on concrete surface. Only a light application is necessary.
- Trowel as normal.
- The contents of one full bag of Control Finish make a solution that will cover approximately 1,000 square feet.

COMPATIBILITY

Control Finish is compatible with most concrete and cement admixtures. When using more than one admixture, each product should be dispensed separately. Control Finish does not contain calcium chloride, nitrates, or other potentially corrosive materials. Store in a dry location, protected from breakage, deterioration, and contamination. Control Finish is not subject to damage from freezing temperatures.

FAQ

Q: Will Control Finish affect concrete color?

A: Control Finish has recently been reformulated to avoid using dark colored material. If applied lightly and evenly, there should be no effect on color.

Q: Will Control Finish affect set times?

A: Not if applied correctly. If excessive amounts are sprayed and accumulate on the surface, retardation may occur.

Q: Can Control Finish be used alongside a concrete color hardener?

A: Yes. Control Finish is particularly well suited to be used with color hardeners.

Q: Can Control Finish be reapplied?

A: Yes. You can reapply as needed.
