

Counter-Flo

CounterTop Admixture

Fritz-Pak Counter-Flo Concrete Counter top Admixture is a mixture of water reducers and mineral admixtures specifically designed for use in the production of concrete counter tops and statuary. It makes concrete more flowable for easy placement without additional water, allowing you to reduce the water/cement ratio in your mix. Lower water content provides a denser and less permeable concrete, making the concrete less prone to staining. Use of Counter-Flo creates a mix with fewer air bubbles that will yield a better pattern definition.

No 99615

MEETS STANDARDS

There are not applicable standards for this product.

PACKAGING:

SIZE	8 lb. Jar
JARS/CASE	1
CASES/PALLET	120

Also available in 4 jar cases.

ADVANTAGES

- Improved finishability
- Reduced risk of cracking
- Easier concrete placement
- Better pigment dispersion in the concrete mix

INSTRUCTIONS

- Add Counter-Flo to the dry concrete. Blend thoroughly and mix the concrete normally, using 20% less water.
- If adding to wet concrete, sprinkle over all the concrete. Then mix for 5 minutes to allow the active ingredient to hydrate and disperse.
- FOR PRE-BAGGED CONCRETE: Use 1 level scoop per 80 lb. bag of concrete. For higher water reduction, you may increase the dosage rate, but do not exceed 3 scoops per bag of concrete.
- FOR SITE-MADE CONCRETE: Add 1 level scoop for each 20 lb. of cement.
- FOR MODIFIED PRE-BAGGED CONCRETE: Add 1 level scoop for each bag of pre-bagged concrete and 1 additional level scoop for every 20 lb. of cementitious materials.
- When using pigments, add Counter-Flo before or with the pigments for a more even dispersion of the pigments in the mix.

COMPATIBILITY

Counter-Flo is compatible with most concrete and cement admixtures. When using more than one admixture, each product should be dispensed separately. Counter-Flo does not contain calcium chloride, nitrates, or other potentially corrosive materials. Store in a dry location, protected from breakage, deterioration, and contamination. Counter-Flo is not subject to damage from freezing temperatures.

FAQ

- Q:** Will Counter-Flo affect concrete color?
- A:** No. Counter-Flo is a white, powdered material that will not impact the color or design pattern of the finished concrete.
- Q:** Will Counter-Flo affect set times?
- A:** Counter-Flo does not have a noticeable impact on the set times of the concrete.
- Q:** Does Counter-Flo affect strength?
- A:** Yes. Counter-Flo improves the strength of the concrete for more durability.
- Q:** Does Counter-Flo require special curing?
- A:** No. You can cure the concrete as you normally would. For the best results, we recommend following the curing guidelines from the American Concrete Institute.
