

Plaster Fast Set

Plaster Fast Set is a white, powdered, non-chloride set accelerator. It is ideal as a replacement for accelerators containing calcium chloride, which weakens plaster, causes corrosion, and interferes with color. Plaster Fast Set safely speeds up the set time and enhances plaster spreadability. It contains no nitrates, and is therefore not hazardous to workers, and requires no environmental reporting. One 5 lb. **water-soluble** bag will reduce set times by up to three hours.

MEETS STANDARDS:

There are no applicable standards for this product.

PACKAGING:

SIZE	5 lb. Bags
BAGS/CASE	8
CASES/PALLET	35

Also available in 50 lb. bags or buckets

Plaster Accelerator

No 98455

WHY CHOOSE PLASTER FAST SET?

- Does not promote steel corrosion
- Improved plaster workability
- English & Spanish instructions
- Easy storage & transportation

INSTRUCTIONS

- When blending plaster at the job site, use 1 bag per 4 bags of cement for temperatures above 45°F. Use 2-3 bags for temperatures below 45°F.
- When using preblended plaster, use 1 bag per 1,000 lb. of plaster for temperatures above 45°F. For temperatures below 45°F, use 2-3 bags.
- Prepare pool plaster mix using all ingredients, including water. Begin mechanical mixing before adding Plaster Fast Set.
- Add the water-soluble bag to the plaster mix in the mixer & continue mixing for 5 minutes.
- If adding Plaster Fast Set to dry plaster blends for sale, add at a rate of 1-3% by weight of cement.

FAQ

- Q:** What is the difference between Plaster Fast Set & NCA?
- A:** There is no difference in the materials. NCA includes dosage & instructions for use in ready-mix concrete, while Plaster Fast Set includes dosage & instructions for use in pool plaster.
- Q:** Will Plaster Fast Set discolor the plaster?
- A:** No. Plaster Fast Set is a white material that will not cause problems with integral colors in the plaster mix.
- Q:** Can Plaster Fast Set be redosed?
- A:** Yes. You can add up to 3 bags of Plaster Fast Set. Adding any additional bags will not increase the acceleration of the plaster.

COMPATIBILITY

Plaster Fast Set is compatible with most concrete and cement admixtures. When using more than one admixture, each product should be dispensed separately. Plaster Fast Set does not contain calcium chloride, nitrates, or other potentially corrosive materials. Store in a dry location, protected from breakage, deterioration, and contamination. It is not subject to damage from freezing temperatures.
