

## Supercizer 2

## Premium Superplasticizer

Fritz-Pak Supercizer 2 is formulated to produce stronger, more durable concrete. It is similar to Fritz-Pak Supercizer 2, but designed for warmer weather. As an extended life slump enhancer, it may be added with the normal amount of mix water to produce more flowable concrete with up to a 7 inch slump increase. When used as a mid-range water reducer, Supercizer 2 will increase concrete compressive strength at all ages, reduce permeability, and increase durability. Supercizer 2 does not contain calcium chloride, nitrates, nitrites, or other potentially corrosive materials, and comes packaged in our water-soluble bags for easy use.

No 95590

## MEETS STANDARDS

ASTM C-494 Type D;  
AASHTO M-194 & CRD C-87

## PACKAGING:

<b>SIZE</b>	1.75 lb. Bags
<b>BAGS/CASE</b>	20
<b>CASES/PALLET</b>	25

Also available in 50 lb. bags

## ADVANTAGES

- 20% water reduction or 7 inch slump increase
- Reduced segregation in the mix
- Reduced risk of cold joints in form work
- Increased early & ultimate concrete strengths

## INSTRUCTIONS

- 1 bag of Supercizer 2 is recommended for each cubic yard of concrete to increase the slump up to 7 inches or achieve up to 20% water reduction.
- Add the water-soluble bag and its contents to the wet concrete mix.
- Mix thoroughly for at least 5 minutes at high speed (15 RPM) to ensure proper dispersion in the mix.
- The slump increase will remain in effect for 30 to 45 minutes, and Supercizer 2 may be redosed if needed.

## FAQ

**Q:** Will Supercizer 2 change air content?

**A:** It may increase air content 1-2%. If air content is critical in your application, eliminate the addition of air entrainment admixtures at the plant and correct the air content at the job site using Super Air Plus if needed.

**Q:** Will Supercizer 2 affect the color of decorative concrete?

**A:** Supercizer 2 will not discolor your concrete. It can improve color when added before the color powder is applied to the concrete.

**Q:** Will Supercizer 2 affect the concrete set time?

**A:** Yes. Supercizer 2 contains a retardant, making it a great product to use for summer projects or in concrete form work.

## COMPATIBILITY

Supercizer 2 is compatible with most concrete and cement admixtures. When using more than one admixture, each product should be dispensed separately. Supercizer 2 does not contain calcium chloride, nitrates, or other potentially corrosive materials. Store in a dry location, protected from breakage, deterioration, and contamination. Supercizer 2 is not subject to damage from freezing temperatures.

## WARRANTY
