

## Plaster Fast Set

Plaster Fast Set is a white, powdered, non-chloride set accelerator. It is ideal as a replacement for accelerators containing calcium chloride, which weakens plaster, causes corrosion, and interferes with color. Plaster Fast Set safely speeds up the set time and enhances plaster spreadability. It contains no nitrates, and is therefore not hazardous to workers, and requires no environmental reporting. One 5 lb. **water-soluble** bag will reduce set times by up to three hours.

### MEETS STANDARDS:

There are no applicable standards for this product.

### PACKAGING:

|              |            |
|--------------|------------|
| SIZE         | 5 lb. Bags |
| BAGS/CASE    | 8          |
| CASES/PALLET | 35         |

*Also available in 50 lb. Bags or buckets*

## Plaster Accelerator

No 98455

### WHY CHOOSE PLASTER FAST SET?

- Does not promote steel corrosion
- Improved plaster workability
- English & Spanish instructions
- Easy storage & transportation

## DOSAGE

Dosage rate varies depending on temperature and the amount of acceleration desired. Increased dosages provide higher acceleration rates.

### WHEN BLENDING PLASTER AT THE JOB SITE

Use one bag per 4 bags of cement for temperatures above 45°F (7°C). Use 2-3 bags for temperatures below 45°F.

### WHEN USING PRE-BLENDED PLASTER

Use one bag per 1,000 lb of plaster for temperatures above 45°F. For temperatures below 45°F, use 2-3 bags.

### IN THE MANUFACTURE OF DRY PLASTER BLENDS

Add at a rate of 1-3% by weight of cement.

## DIRECTIONS

1. Determine the amount of Plaster Fast-Set required. See Recommended Dosage Rate.
2. Prepare pool plaster mix using all ingredients, including water. Begin mechanical mixing before adding Plaster Fast-Set.
3. Remove the protective outer bag, place the inner water-soluble bag and contents in the plaster mix.
4. Continue mixing for at least 5 minutes for complete dispersion of the Plaster Fast-Set throughout the mix. Improper mixing can result in poor performance.

## FREQUENTLY ASKED QUESTIONS

**Q.** What is the shelf life of Plaster Fast-Set?

**A.** If stored properly, about 3-6 years. If the material ever seems hard or caked, do not use it. It will not break up in the mix.

**Q.** How will Plaster Fast-Set affect my plaster?

**A.** It will speed up the set time of plaster.

**Q.** What advantages does using a plaster set accelerator have?

**A.** Since Plaster Fast-Set accelerates the set of plaster, it will give you better results at low temperature. It saves you time when you want to finish early, because of weather or scheduling issues, or to increase productivity.

**Q.** Does Plaster Fast-Set contain any calcium chlorides?

**A.** No.

**Q.** Will Plaster Fast-Set affect the color of the plaster?

**A.** No. Plaster Fast Set is white in color, and it will not harm integral colors in plaster.

**Q.** What is the recommended dosage rate of Plaster Fast-Set?

**A.** A 5-lb bag should be added to 1000 lbs of plaster.

**Q.** Can I increase the dosage of Plaster Fast-Set?

**A.** Yes. Up to three 5-lb bags per 1000 lbs of plaster may be used. Additional bags will not significantly reduce the set time.

**Q.** What is the difference between Fritz-Pak NCA and Plaster Fast-Set?

**A.** None. The only difference is the packaging. The packaging of NCA has instructions for use in ready mix concrete, while Plaster Fast-Set has instructions for use in pool plaster.

## COMPATIBILITY & PRECAUTIONS

Plaster Fast Set is compatible with most concrete and cement admixtures. When using more than one admixture, each product should be dispensed separately. Plaster Fast Set does not contain calcium chloride, nitrates, or other potentially corrosive materials. Store in a dry location, protected from breakage, deterioration, and contamination. Plaster Fast Set is not subject to damage from freezing temperatures.
