PLASTER FAST SET

PLASTER ACCELERATOR

Plaster Fast Set is a powdered, non-chloride set accelerator ideal as a replacement for accelerators containing calcium chloride. Plaster Fast Set speeds up the set time and enhances plaster spreadability. One 5-pound **water-soluble** bag will reduce set times by up to three hours.

BENEFITS

- Does not promote steel corrosion
- Improves plaster workability
- Non-hazardous materials
- No discoloration of the plaster

CERTIFICATIONS

There are no applicable standards for this product.

PACKAGING

ITEM NUMBER	WEIGHT	BAGS PER CASE	CASES PER PALLET
98455	5 pounds	8	35
98457	50 pounds	1	40

DOSAGE

Dosage rate varies depending on temperature and the amount of acceleration desired. Increased dosages provide higher acceleration rates.

When blending plaster at the job site, use one bag per 4 bags of cement for temperatures above 45°F (7°C). Use 2-3 bags for temperatures below 45°F.

When using pre-blended plaster, use one bag per 1,000 lb. of plaster for temperatures above 45°F. For temperatures below 45°F, use 2-3 bags.

In the manufacture of dry plaster blends, add at a rate of 1-3% by weight of cement.

DIRECTIONS

1. Determine the amount of Plaster Fast-Set required. See Recommended Dosage Rate.

2. Prepare pool plaster mix using all ingredients, including water. Begin mechanical mixing before adding Plaster Fast-Set.

3. Remove the protective outer bag, place the inner water-soluble bag in the plaster mix.

4. Continue mixing for at least 5 minutes for complete dispersion of the Plaster Fast-Set throughout the mix. Improper mixing can result in poor performance.

FREQUENTLY ASKED QUESTIONS

QUESTIONS	ANSWERS
What is the shelf life of Plaster Fast-Set?	If stored properly, about 3-6 years. If the material ever seems hard or caked, do not use it. It will not break up in the mix.
How will Plaster Fast-Set affect my plaster?	It will speed up the set time of plaster.
Why use a plaster accelerator?	ince Plaster Fast-Set accelerates the set of plaster, it will give you better results at low temperature. It saves you time when you want to finish early, because of weather or scheduling issues, or to increase productivity.
Does Plaster Fast-Set contain chlorides?	No.
Will Plaster Fast-Set discolor my plaster?	No. Plaster Fast Set is white in color, and it will not harm integral colors in plaster.
Can I increase the dosage?	Yes. Up to three 5-lb. bags per 1000 lbs. of plaster may be used. Additional bags will not significantly reduce the set time.
What is the difference between Fritz-Pak NCA and Plaster Fast-Set?	None. The only difference is the packaging. The packaging of NCA has instructions for use in concrete, while Plaster Fast-Set has instructions for use in pool plaster.

COMPATIBILITY AND STORAGE

Plaster Fast Set is compatible with most concrete and cement admixtures. When using more than one admixture, each product should be dispensed separately. Plaster Fast Set does not contain calcium chloride, nitrates, or other potentially corrosive materials. Store in a dry location, protected from breakage, deterioration, and contamination. Plaster Fast Set is not subject to freezing.
